CrowdWays

Optimized crowd simulation environment

Make the **Crowd** part of your **Decision Process**

CrowdWays is a complete multi-agent simulation environment providing scenario-based analysis capability to support decision-making.

Engineered to scale with your simulation requirements, CrowdWays supports simulation with more than 100 000 entities simultaneously on a single computer.

Rapid scenario development

Work from an intuitive graphical user interface to create realistic environments efficiently. No code required for the scenarios configuration.

Facilitate decision making

Analysis capability providing easy scenario comparison

Suitable for all environment

CrowdWays is flexible enough to model and simulate scenarios in all kinds of environments like outdoors, buildings, ships, stadiums, etc...
