HLA

Toolbox

Connect and interoperate with MATLAB®

Bridging Engineering & Simulation

The HLA Toolbox™ is the MATLAB® link enabling seamless connection between precise and reliable engineering models with Live – Virtual – Constructive (LVC) simulations.

Reusability

Convert existing stand-alone MATLAB® models into essential components of a multi-systems simulation

Interoperability

Transform MATLAB® into a powerful development environment compatible with any HLA compliant system

Deployment Capability

Royalty free deployment possibility enabling flexible execution and collaboration

MATLAB is a registered trademark of the MathWorks
