HLA Blockset

Connect and interoperate with Simulink®

Bridging Engineering & Simulation

The HLA Blockset™ is the Simulink® library enabling seamless connection between precise and reliable engineering models and Live – Virtual – Constructive (LVC) simulations.

Reusability

Convert existing stand-alone Simulink® models into essential components of a multi-systems simulation

Interoperability

Transform Simulink® into a powerful development environment compatible with any HLA compliant system

Deployment Capability

Royalty free deployment possibility enabling flexible execution and collaboration

Simulink is a registered trademark of the MathWorks
